10:30 BUILDING A RESILIENT PHARMA SUPPLY CHAIN BEYOND COVID-19

- Supply chain challenges – during, after and beyond COVID-19
- What are the main priorities for the pharma supply chain today compared to three years ago?
- How has the pandemic changed our way of thinking?
- Future challenges and opportunities – are we ready for the next global pandemic?
- Is it possible to build in bullet-proof resilience to supply chain disruptions?

Presentation by Yoram Eshel, Former Head of Global Transportation & Logistics at Teva Pharmaceuticals, and Founder & CEO of Cannabilog

11:00 MORNING BREAK: NETWORKING AND REFRESHMENTS

11:40 AIR CARGO LOGISTICS FOR TEMPERATURE-CONTROLLED PHARMACEUTICALS

How standards and certifications improve quality and reduce risk for pharmaceutical air cargo shipments.

Presentation by Sonia Ben Hamida, PhD, Head of Special Cargo, International Air Transport Association (IATA)

12:10 MANAGING MEDICINE SHORTAGES: REDUCING THE IMPACT ON THE PHARMA SUPPLY CHAIN

- Lessons learned after the pandemic and other crises impacting global supply chain, e.g. looking at insecure markets, raw material / energy supply, uncertain customers / distributors or unreliable suppliers and the effects on the pharma supply chain
- Analysing the collaboration between all supply chain stakeholders

Agenda for FlyPharma Europe | 20-21 September 2022 | Leipzig, Germany

- Challenges, solutions, best practice and forecast for a functioning supply chain for advanced therapy manufacturing

Presentation by Dr Uwe Rettig, Vice President Supply Chain, IDT Biologika

12:40 HOW THE CONTROL TOWER BECAME MISSION CRITICAL TO VACCINE DISTRIBUTION – CASE STUDY

The COVID-19 pandemic shed light on supply chain vulnerabilities, but it also has led to opportunities to improve processes and accelerated technology adoption. Thankfully, over the last several years, the pharmaceutical supply chain has increased its use of real-time technology and cloud-enabled analytics. Resilient pharma companies are using tools that provide the historical, live, and predictive analytics capabilities that allow them to quickly adjust course when needed. The future supply chain will have resilience woven throughout each link. It will be based on visibility, collaboration, and automation.

Presentation by Ada Palmadottir, VP of Business Development, Controlant, and Tomas Fant, Temperature Control Logistics Global Projects Lead, Pfizer

- Importance of robust supply chain for patient-centric advanced therapy manufacturing
- Lessons learned after the pandemic and other crises impacting global transportation
- Case study

Presentation by Christian Schenk, Industry Lead Life Sciences, time:matters

10:50 IS BETTER TEMPERATURE CONTROL THE RESPONSIBILITY OF LOGISTICS COMPANIES, OR SHOULD PHARMA STEP UP AND LEAD BY EXAMPLE?

Pharma companies can have very special requirements for their temperature-controlled shipments. Scientifically unique items can be very vulnerable to changes in defined conditions, and pharma companies understand their products intimately. On the other hand, logistics companies have the knowhow and expertise about the packaging solutions and processes available to fulfill all possible requirements. This presentation will discuss how to combine all this expertise in the best possible way to create successful, compliant and cost-effective services.

Presentation by Maria Lahtinen, VP Operations, Faron Pharmaceuticals
